

Recovery
*from pornography addiction
and other
compulsive sexual behaviors
is possible.*

Find Answers. Discover Life.

Phase I: “Getting Started Workshop” is an eight-week educational course for people struggling with sexual addiction and for their partners. The first of a 3-phase program, this exciting new course provides participants with a better understanding about sexual addiction and its underlying issues, and teaches participants how to begin the journey toward peace, hope, and healing. The primary focus of the “**Getting Started Workshop**” is to educate. We have found that when clients are well-informed about the underlying issues that influence unhealthy behaviors, they become empowered to take a more proactive approach to recovery and life.
